

Sooraj Kumar

Senior Java Backend Engineer | Spring Boot, Microservices & Cloud-Native APIs

+92-311-0138020 | soorajbinary@gmail.com | LinkedIn | GitHub | HackerRank | Karachi, Pakistan

Professional Summary —

Senior Java backend engineer with **5+ years** designing and delivering scalable **Spring Boot** and cloud-native microservices (**Quarkus**) for fintech and enterprise platforms. Strong in **RESTful APIs**, **Hibernate/JPA**, **MySQL/Oracle**, security (OAuth 2.0/JWT), and CI/CD with **Docker/Kubernetes**. Experienced mentoring engineers, guiding technical decisions, and collaborating across teams with a consulting mindset—focused on performance, security, maintainability, and production reliability.

Technical Skills

- **Java & Frameworks:** Java 21, Spring Boot, Quarkus (cloud-native microservices; Micronaut-adjacent stack), Hibernate, JPA, Spring Security, Java EE, AOP
- **APIs & Architecture:** RESTful APIs, OpenAPI/Swagger, Microservices, Event-Driven Architecture, Domain-Driven Design, Clean Architecture
- **Databases & ORM:** MySQL, Oracle DB, PostgreSQL, DB2, SQL Server, MongoDB, Hibernate/JPA, Liquibase, query & transaction optimization
- **Cloud & Containers:** Azure (hands-on), AWS (Lambda/S3/ECS-style cloud patterns — working knowledge), Docker, Kubernetes, Maven, Jenkins, GitHub Actions, CI/CD
- **Messaging & Cache:** Apache Kafka, RabbitMQ, Artemis, Redis
- **Observability & Quality:** ELK Stack, Grafana, Prometheus, distributed tracing, JaCoCo, SonarQube, JUnit, secure coding & testing practices
- **Leadership:** Mentoring, technical interviews/recruiting support, code reviews, cross-team technical point-of-contact

Professional Experience

Contour Software

Feb 2026 – Present

Senior Software Engineer — Principal Backend Contributor

Karachi, Pakistan

- Serving as a senior/principal engineer on enterprise fintech platforms—driving design, implementation, and performance of backend services
- Architecting **Java 21/Spring Boot** microservices and scalable APIs for high-volume financial transaction processing
- Coordinating with architects and product stakeholders on requirements, technical design, and delivery trade-offs
- Mentoring through technical interviews and candidate evaluation across backend, database, and cloud technologies
- Acting as a technical point of contact for reliability issues; improving observability and production troubleshooting practices

Genesis AI

May 2025 – Jan 2026

Full Stack Engineer (Java & Angular)

Texas, USA (Remote)

- Designed, developed, and maintained secure **Spring Boot** microservices and **RESTful APIs** for Open Finance platforms
- Implemented OAuth 2.0, OpenID Connect, and JWT for authentication/authorization across API-driven services
- Integrated **Kafka** for event-driven microservice communication; optimized API performance and production reliability
- Collaborated with cross-functional teams on design alternatives, incident response, and maintainable service boundaries

Teresol Pvt. Ltd.

Nov 2023 – May 2025

Software Design Engineer — Core Banking Microservices

Karachi, Pakistan

- Principal developer on core-banking modernization using **Quarkus** microservices (lightweight, cloud-native Java comparable to Micronaut-style stacks)
- Built REST backends with Hibernate-style data access, Redis caching, and Artemis messaging for scalable, resilient services
- Optimized relational workloads (DB2) for ACID financial transactions; enforced API security via OAuth2/JWT at the gateway
- Containerized and orchestrated services with **Docker/Kubernetes**; owned CI/CD automation (Jenkins, GitHub Actions)
- Led production support using **ELK**, Grafana, and Prometheus; planned fixes for bottlenecks and guided junior engineers on debugging

Perfekt Solutions Ltd.

Jan 2020 – Jun 2023

Backend Developer (Java / Spring / Oracle)

Sukkur, Pakistan

- Developed Spring MVC/REST backends with Hibernate and role-based Spring Security for regulated business applications

- Built and tuned SQL, stored procedures, and transactions on **Oracle DB** and SQL Server; worked with MySQL-class relational patterns
- Established Maven/Jenkins CI, unit/integration testing with JUnit, and collaborative Agile delivery with frontend teams

Fiverr — Freelance

Jan 2020 – May 2024

Java & Spring Boot Developer

Remote

- Delivered Spring Boot and Java EE/Hibernate backends for international clients; practiced consulting-style requirement clarification and delivery ownership

Selected Projects

Constellation Payments — CSIPay & Pyxis

Global

- Built PayFac/Payment Gateway microservices with TypeScript and Java EE; cloud deployment with messaging for high-volume settlement flows
- Conducted thorough PR reviews and upheld secure, maintainable coding standards across the team

BAHL Core Banking System Revamp

Pakistan

- Led modernization of legacy core banking to distributed **Quarkus** microservices supporting **10,000+** ACID transactions
- Implemented transaction-safe data access, Docker/Kubernetes auto-scaling, and CI/CD quality gates for production stability

Enterprise Management Systems — Open Finance Platform

USA

- Delivered Spring Boot REST APIs with OpenAPI/Swagger, OAuth 2.0/JWT, Kafka scalability, and multi-tenant RBAC/audit logging

Education

Sukkur IBA University

Feb 2019 – Aug 2023

Bachelor of Science in Computer Science

Sukkur, Pakistan

- **Four-year fully funded scholarship** — shortlisted among top 100 candidates nationwide
- Leadership programs: Youth Impact Wilderness Camping; Young Leader's Conference (YLC)

Certifications

- GitHub Foundations | Problem Solving (HackerRank) | Artificial Intelligence Foundation
- Security Awareness | HIPAA Business Associates | GDPR | AML | Credit Card Security
- Data Structures and Performance & Advanced Data Structures in Java (Coursera)
