

Sooraj Kumar

Senior Software Engineer | Building Intelligent Systems with AI-Accelerated Workflows

+92-311-0138020 | soorajbinary@gmail.com | LinkedIn | GitHub | HackerRank | Karachi, Pakistan

Professional Summary —

Senior Software Engineer with **5+ years** building high-performance backend and full-stack systems for **fintech**, Open Banking, and enterprise platforms. Expert in **Java 21**, **Spring Boot**, **Quarkus**, and event-driven architectures using **Kafka**, **RabbitMQ**, **Redis**, and containerized services on **Azure/Kubernetes**. Actively shipping **LLM-powered automation**, AI-assisted analytics, and intelligent document workflows inside production systems—delivering measurable reliability, throughput, and developer velocity gains.

Technical Skills

- **Languages:** Java 21, TypeScript, JavaScript, Python, SQL, Dart, Kotlin
- **Backend:** Spring Boot, Quarkus, Hibernate, Spring Security, Microservices, Java EE, FastAPI, Node.js
- **AI / LLM:** OpenAI APIs, LangChain, Whisper, RAG, LLM API Integration, Intelligent Automation
- **Frontend:** Angular, React, Flutter, HTML5, CSS3, OpenAPI/Swagger
- **Messaging & Data:** Apache Kafka, RabbitMQ, Artemis, Redis, MySQL, PostgreSQL, DB2, MongoDB, Oracle, SQL Server, Liquibase
- **Cloud & DevOps:** Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Maven, AWS (Basic)
- **Observability & Quality:** ELK, Grafana, Prometheus, JaCoCo, SonarQube, JUnit, Distributed Tracing
- **Security:** OAuth 2.0, OpenID Connect, JWT, RBAC, GDPR/HIPAA/AML awareness

Professional Experience

Contour Software

Feb 2026 – Present

Senior Software Engineer

Karachi, Pakistan

- Designing and evolving enterprise-scale **fintech** platforms focused on performance, reliability, and intelligent automation
- Architecting distributed microservices with **Java 21** and **Spring Boot** for high-volume financial transaction processing
- Building event-driven backends with **Kafka** and async messaging; strengthening observability via tracing and production telemetry
- Integrating **AI-assisted workflows** and automation into fintech operations to accelerate delivery and reduce manual effort
- Conducting technical interviews across backend, frontend, database, and cloud technologies

Genesis AI

May 2025 – Jan 2026

Full Stack Engineer (Java & Angular)

Texas, USA (Remote)

- Designed and maintained secure **Spring Boot** microservices for API-driven Open Finance / Open Banking platforms
- Implemented RESTful APIs with **OAuth 2.0**, **OpenID Connect**, and **JWT** for authenticated, auditable data sharing
- Integrated **Kafka** for event-driven service communication, improving decoupling and throughput
- Embedded LLM APIs and automation pipelines to increase application intelligence and reduce operational toil
- Delivered **Angular** dashboards for real-time visualization; diagnosed production issues and optimized API latency

Teresol Pvt. Ltd.

Nov 2023 – May 2025

Software Design Engineer — Core Banking

Karachi, Pakistan

- Built scalable core-banking services with **Quarkus** microservices, hot reload, and clean modular boundaries
- Implemented async, event-driven workflows via **Artemis**; applied **Redis** caching to raise throughput and cut DB load
- Optimized **DB2** queries/indexing for ACID financial operations; enforced API security (OAuth2/JWT) at the gateway
- Containerized services with **Docker/Kubernetes** auto-scaling; automated CI/CD with Jenkins and GitHub Actions
- Drove observability with **ELK**, Grafana, and Prometheus; performed load testing and production incident support

Perfekt Solutions Ltd.

Jan 2020 – Jun 2023

Backend Developer

Sukkur, Pakistan

- Developed RESTful APIs and Spring-based backends using MVC, Singleton, and Factory patterns for maintainable systems
- Secured applications with Spring Security (RBAC); optimized SQL, stored procedures, and transactions on Oracle DB / SQL Server
- Automated builds/deployments with Maven and Jenkins; added logging, monitoring, and JUnit coverage for stable releases
- Collaborated in Agile teams with frontend engineers (HTML/CSS/JS) on validated data exchange in regulated environments

Fiverr — Freelance

Jan 2020 – May 2024

Java & Spring Boot Developer

Remote

- Delivered production Spring Boot backends, Java EE/Hibernate web apps, and desktop solutions for international clients over 4+ years

Selected Projects

Constellation Payments — CSIPay & Pyxis (PayFac / Gateway)

Global

- Built PayFac and Payment Gateway capabilities with TypeScript, Java EE, and microservice architecture
- Deployed cloud services with messaging for horizontal scale; designed settlement/reconciliation flows for high-volume payments
- Upheld strong code quality through maintainable design and rigorous pull-request reviews

BAHL Core Banking System Revamp

Pakistan

- Modernized Bank Al-Habib's legacy (1996 Java Swing) core banking stack into a distributed **Quarkus** microservices platform
- Supported **10,000+** ACID-compliant financial transactions with consistency guarantees and transaction-safe DB2 access
- Built FSM middleware bridging Vue.js clients and backends; shipped Docker/Kubernetes deployments with CI/CD gates

Enterprise Management Systems — Open Finance Platform

USA

- Delivered Spring Boot REST APIs with OpenAPI/Swagger docs, OAuth 2.0/JWT controls, and Kafka-backed event scalability
- Enabled multi-tenant enterprise workflows with RBAC and audit logging aligned to Open Banking principles

LifeDox — AI-Powered Digital Memoir Chatbot

Mobile / AI

- Built Flutter (Android/iOS) memoir app with OpenAI chat, Whisper speech-to-text, Firebase auth/storage, and automated PDF book generation

AI Document Analyzer (FasTech Systems Internship)

Jul 2023 – Aug 2023

- Built end-to-end OpenAI + LangChain PDF analyzer on FastAPI for automated document extraction; deployed for real-time cloud inference

Education

Sukkur IBA University

Feb 2019 – Aug 2023

Bachelor of Science in Computer Science

Sukkur, Pakistan

- **Four-year fully funded scholarship** — shortlisted among top 100 candidates nationwide for academic excellence
- Selected for fully funded Youth Impact Wilderness Camping (65 nationwide) and Young Leader's Conference (YLC)

Certifications

- Artificial Intelligence Foundation | GitHub Foundations | Problem Solving (HackerRank)
- Security Awareness Foundation & Training | HIPAA: Business Associates | GDPR Data Protection
- Anti-Money Laundering (AML) | Credit Card Security | Data Structures & Advanced DS in Java (Coursera)
