

Sooraj Kumar

Full-Stack Software Engineer | React, TypeScript, APIs & AI-Enabled Web Solutions

+92-311-0138020 | soorajbinary@gmail.com | LinkedIn | GitHub | HackerRank | Karachi, Pakistan

Professional Summary —

Full-stack engineer with **5+ years** designing and shipping modern web applications, internal platforms, and customer-facing solutions that connect business workflows to scalable technical systems. Strong across **JavaScript/TypeScript, React, Angular, Python/FastAPI**, and Java/**Spring Boot** backends—building REST APIs, database integrations, and reusable UI components. Experienced collaborating with **US-based** and cross-functional teams, applying design patterns and performance/security best practices, and delivering **AI-enabled** features with OpenAI, LangChain, RAG-style workflows, and AI-assisted development tooling.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, SQL, Java 21, Dart, HTML5, CSS3
- **Frontend:** React, Angular, Flutter, Responsive Web Development, Component-based UI, Figma collaboration, Material-UI / modern UI libraries
- **Backend & APIs:** FastAPI, Spring Boot, Quarkus, Node.js, REST APIs, OpenAPI/Swagger, JWT/OAuth 2.0, third-party API integration
- **Databases:** PostgreSQL, MySQL, Oracle, SQL Server, MongoDB, Redis, DB2, Firebase
- **AI-Enabled Development:** OpenAI APIs, LangChain, Whisper, RAG / document intelligence, prompt-driven automation, AI-assisted coding workflows (Cursor / Copilot-style tooling)
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Azure, AWS (Basic), Git, Maven
- **Core:** Analytical problem solving, debugging, production troubleshooting, technical documentation, cross-team communication

Professional Experience

Contour Software

Feb 2026 – Present

Senior Software Engineer

Karachi, Pakistan

- Designing scalable fintech web platforms that support business operations, reliability, and intelligent automation
- Building backend APIs and distributed services with **Java 21/Spring Boot** for high-volume transactional workflows
- Collaborating with engineering and stakeholders to translate requirements into maintainable technical designs
- Integrating AI-assisted workflows to accelerate delivery while validating generated code for correctness and security
- Conducting technical interviews and communicating clearly across backend, frontend, database, and cloud topics

Genesis AI

May 2025 – Jan 2026

Full Stack Engineer (Java & Angular) — US Remote

Texas, USA (Remote)

- Partnered with **US-based** product/engineering teams to clarify requirements and deliver Open Finance web platforms
- Developed secure backend **REST APIs** (Spring Boot) with OAuth 2.0, OpenID Connect, and JWT authorization
- Built responsive **Angular** interfaces and reusable UI components for real-time operational dashboards
- Integrated **Kafka** and LLM APIs/automation pipelines to support scalable, AI-enabled application workflows
- Debugged production issues across frontend/backend boundaries; improved API performance and reliability

Teresol Pvt. Ltd.

Nov 2023 – May 2025

Software Design Engineer — Core Banking Platforms

Karachi, Pakistan

- Built scalable backend services and API integrations for customer-facing banking workflows using **Quarkus** microservices
- Implemented **Redis** caching, Artemis messaging, and relational data access (DB2) to improve performance and reliability
- Applied design patterns and clean modular architecture for maintainable, testable services under production load
- Containerized applications with **Docker/Kubernetes**; automated CI/CD with Jenkins and GitHub Actions
- Documented operational behavior via observability dashboards (ELK, Grafana, Prometheus); resolved production incidents

Perfekt Solutions Ltd.

Jan 2020 – Jun 2023

Backend Developer

Sukkur, Pakistan

- Developed REST APIs and business logic with Spring; integrated Oracle DB / SQL Server for data-driven applications
- Applied MVC/Factory/Singleton patterns; secured apps with JWT/RBAC-style authentication and authorization
- Collaborated with frontend engineers on HTML/CSS/JS data exchange; tested and debugged end-to-end features
- Automated builds with Maven/Jenkins and improved logging/monitoring for faster troubleshooting

Fiverr — Freelance

Jan 2020 – May 2024

Full-Stack JavaScript / Java Developer

Remote

- Delivered client web backends and UI-connected APIs; practiced requirement clarification, iteration, and clear client communication

Selected Projects

LifeDox — AI-Powered Digital Memoir Chatbot

AI Web / Mobile

- Built an AI-enabled product with OpenAI chat + Whisper speech-to-text, Firebase auth/storage, and automated PDF generation
- Designed intuitive conversational UX (Flutter + Figma) for customer-facing memoir capture across Android/iOS

AI Document Analyzer (FasTech Systems)

Jul 2023 – Aug 2023

- Developed a **Python/FastAPI** backend integrating OpenAI + **LangChain** for RAG-style PDF analysis and information extraction
- Optimized API response times and deployed cloud inference endpoints for real-time document intelligence workflows

Enterprise Management Systems — Open Finance Web Platform

USA

- Delivered Spring Boot REST APIs with OpenAPI docs, OAuth 2.0/JWT, and multi-tenant RBAC for business workflows
- Supported scalable event-driven integrations (Kafka) and customer/enterprise-facing data-sharing use cases

Constellation Payments — CSIPay & Pyxis

Global

- Built payment platform services with TypeScript/Java EE microservices, third-party integrations, and cloud messaging for scale

BAHL Core Banking System Revamp

Pakistan

- Modernized legacy banking into distributed Quarkus services with Vue.js frontend integration via FSM middleware
- Supported **10,000+** ACID transactions; shipped Docker/Kubernetes deployments with CI/CD quality gates

GaugeRO / Digital Darzi — Customer-Facing Apps

Product

- Delivered responsive Flutter UIs with Firebase real-time sync, OTPless auth, and Node.js/MongoDB + Azure backend services

Education

Sukkur IBA University

Feb 2019 – Aug 2023

Bachelor of Science in Computer Science

Sukkur, Pakistan

- **Four-year fully funded scholarship** — shortlisted among top 100 candidates nationwide
- Coursera: Data Structures and Performance; Advanced Data Structures in Java

Certifications

- Artificial Intelligence Foundation | GitHub Foundations | Problem Solving (HackerRank)
- Security Awareness | HIPAA Business Associates | GDPR | AML | Credit Card Security
